

Sea Spray Paspalum Vaginatum

General Overview

Çimser Grass Production Industry and Commerce Ltd has the right of selling and marketing SeaSpray® grass in Turkey and Northern Cyprus.

It is the only variety which provides outstanding turf quality and has fine texture thin foliage. The mowing height is 3 millimeters.

It is a warm season grass. It has a bright blue-green colour. It tolerates soil with a pH range of 4,5-9,0. Due to strong root structure it is extremely salt tolerant turfgrass. In the case of flood and overflow it tolerates water logging.

There is no disease or weeds when it is watered with low quality salty water. It is medium shade durable. It should be careful when using nitrogen fertilizer in the summer because it needs less nitrogen, due to rapid nutrient uptake. SeaSpray rollgrass is ready for use immediately after it has been laid out. However, stolon needs four weeks' time to become ready for use.

Characteristics

Colour : Bright Blue- Green

Texture : Dense – Medium thickness

Performance : It is extremely salt tolerant . It is ideal for humid coastal climates and for areas where the irrigation water is salty.
There is no disease or weeds when it is watered with low quality salty water.
Due to strong root structure it is extremely salt tolerant turfgrass. It is medium shade durable.
It has a bright blue-green colour. It tolerates soil with a pH range of 4,5-9,0.
In the case of flood and overflow it tolerates water logging (puddles).
It should be careful when using nitrogen fertilizer in the summer because it needs less nitrogen, due to rapid nutrient uptake.
It provides outstanding turf quality. It is heavy –foot- traffic tolerant.

Climate : It is ideal for temperate-to-hot climates

Mowing : Generally mowing height should be between 1,5 cm and 5 cm.
Mowing height should not be more than one-third of the grass height.
When mowed with revolving machineries , it is recommended that the mowing height should not be less than 2cm.
When mowed with machines with high power and cylindric blades, the mowing height can be less than 2 cm.
The blades of the mowing machine should be sharp.
Grass should not be mowed when it is wet.

Cutting Options : Small rollgrass cutting. (Each roll covers ½ square meters)
Big Cutting

Application Areas
